Nescens Clinique de Genolier dedicates a specialised clinic of over 5,000 sqm in size exclusively to preventive medicine and anti-aging programs, nestled high above Lake Geneva close to Geneva international airport. It regroups the different specialties and medical expertise to the detection, prevention and treatments of any pathology linked to the aging process – permitting to take over the management of health capital and capability of aging in a healthy body.

This expertise includes preventive and regenerative medicine, genetic screening, nutrition, and management of the physical capital of the body and osteo-articular without neglecting aesthetic medicine and anti-aging programs. The innovative concept is based on the scientific expertise of Professor Jacques Proust, a pioneer in the biology of aging and anti-aging medicine who shares his over 25 years worth of knowledge, experience and expertise with his patients.

Nescens Clinique de Genolier acknowledges and indulges the needs of personalised treatments as well as utmost comfort to fully rejuvenate body and mind at the same time. Beside spacious consultation and examination laboratories, Nescens Clinique de Genolier offers the possibility to organise each stay in residences with five star hotel services, gastronomic offers, and other premium facilities for short, medium and long-term stays.

Nescens Clinique de Genolier incorporates all the activities of the Centre of Preventive Medicine and its very sophisticated and highly personalised Medical Check-ups including Essential, Essential Woman Plus, Advanced, Advances Woman Plus, Excellence, Excellence Woman Plus, and Excellence Onco Plus for both man and woman, as well as specialized consultations including prevention and management of any kind of pathologies linked to advance aging. Nescens Clinique de Genolier also offers an exclusive program called Men's health: a complete package targeting the prevention and treatment of male-specific, age-related pathologies.

To further extend the range of facilities, there is also a centre of expertise in physiotherapy, sport coaching and other medical and aesthetical activates such as stem cells, aesthetic medicines and dental care just next to Nescens Clinique de Genolier facilities. They include over 150 doctors and specialists qualified with a full range of technical and state of the art equipment, especially in the area of radiology, and in support of the Swiss Medical Network – beneficially of a network of over 1,250 doctors and specialists all over Switzerland.
